## Preface to Second Edition,

After this method had been published, it was shown to me by various Professors and Teachers of the Guitar, that the preliminary exercises were too difficult for the average beginner. I have endeavoured to rectify this, and have written twenty-three New Progressive Exercises for that purpose. They will be found exceedingly easy, and only very gradually increase in difficulty. I wish to take this opportunity to call attention to Mr. FROANE's little handbook, "The Guitar and how to Study it." It will be of great assistance to the earnest student of this method.

IMPROVED  
METHOD FOR THE GUITAR.

.....

Author's Preface,

---

IN presenting this method to the public, it is with the impression that although there are a great many such works already issued, they are either incomplete or old-fashioned, or both. In respect of being old-fashioned, so many new ideas have been created and old ones discarded, that an old-fashioned method is practically useless.

The Author has endeavoured as much as it lay in his power, to make each exercise a tuneful one, and each explanatory note, short and concise, so that the student may be interested. He is indebted to MR. A. FROANE for the examples 5 to 27. The Author has been content to explain in this method only the effects obtainable on the guitar when tuned in its original manner. The only alteration the great masters indulged in was to lower the low E string to D and occasionally raise it to F. But as for tuning the whole instrument differently, it was never thought of.

The difficulties of the guitar, are not so great as some people imagine. With a little natural talent and close application, anyone may overcome those difficulties which at first sight appear so formidable.

ERNEST SHAND.

LONDON.

1896.

## THE MANNER OF HOLDING THE GUITAR.

---

A—The Head.  
B—The Fingerboard.  
D—The Sound Hole.  
E—The Bridge.

THE most convenient way of holding the Guitar is to have a stool for the left foot, the part C resting on the left knee, the opposite side of the Guitar resting against the chest; the left hand can then move freely up and down the fingerboard.

The neck should rest firmly on the thumb, and the further it is towards the top of the thumb the greater freedom will be allowed the fingers. If the neck is resting flat in the hollow between the thumb and 1st finger—as is very often done—the fingers are restricted, and have not natural play. But the position is often altered to obtain certain chords and to enable the use of the thumb.\*

The 4th finger of the right hand should be placed on the sounding-board at about F. It is a support to the hand, and enables the fingers to move freely. Later on it will be shown that at times in certain passages, it is advisable to lift it up, but for the beginning, let it remain down. The position of the hand should be in the angle G to F.

Let me advise the student to get a good guitar at the beginning. Do not be under the popular impression that anything is good enough with which to commence. A good instrument is essential, and never deteriorates by being played upon. A common one, on the other hand, is impossible to tune correctly.

Lacote was the best maker of Guitars; and many good instruments can be found amongst old French, Italian and Spanish models.

## ON THE RIGHT HAND.

---

It is wrong to give as a fixed rule that the thumb is used for the three covered strings, and the 1st, 2nd and 3rd fingers for the 3rd, 2nd and 1st strings. Though that method is often employed, it is by no means a fixed rule. The third finger is the weakest and most unruly of all, so it is seldom employed, except in the case of a chord of four or more notes. The thumb, 1st and second being the most important factors. In striking with the thumb, let the string be struck firmly, but let the thumb travel directly to the next string and remain resting upon it. This method gives a more sonorous tone to the bass strings than when the thumb is raised after striking. Keep the thumb quite straight, not curved in any way. In certain cases it is advisable to raise the thumb after striking, both in chords and in single notes, especially in quick passages and in the repetition of bass notes, in which case the first method would be laboured. But avoid getting the thumb *underneath* the string or it will jar. Always bear in mind this fact, that *the strings should vibrate from side to side, and not up and down*. Direct the fingers to the middle of the palm of the hand, and the thumb towards the next string, which, in so doing, crosses over the 1st finger.

\* Ferdinand Sor never used the left thumb, Giuliani, and others, did.

The correct position of the Hand after striking a Chord.

It is a very easy matter to claw the strings, and pull them up, so that when the fingers have left the strings, the thumb and fingers meet together (*see Plate 3*). The result is, the strings jar—which of all things is to be avoided. The joints next to the nail want to be limp, not *rigid*, and the rest of the finger as little curved as possible. The hand should be in the position of the angle G to F (*see Plate 1*).

## ON FINGERING.

SIGNS FOR LEFT HAND	RIGHT HAND.	POSITIONS & FRETS.
× .... thumb	^ .... thumb	I.
1 .... 1st finger	· .... 1st finger	II.
2 .... 2nd ,,	¨ .... 2nd ,,	III.
3 .... 3rd ,,	ˆ .... 3rd ,,	IV.
4 .... 4th ,,		V., etc.
o .... Open string		

The wrong position.

The tips of the fingers of each hand are used, those of the left hand pressed very firmly between the frets, but close to the fret, producing the note desired. Perhaps in striking a note it jars, and having discovered it is not caused by the instrument, or the right hand, move the finger of the left hand nearer the fret above (*see Plate 4*).

## —✻ CHORDS. ✻—

In striking a chord, or the component parts of a chord, always place the fingers of *both hands* in position *first*. That is to say, prepare, with both hands, for what notes are coming, whenever it is possible.

The notes of a chord should seldom be struck all at once by the right hand, but the fingers placed on the strings preparatory to striking, then raised one after the other quickly. This gives a harp-like effect, which greatly enhances the beauty of a common chord. The sign } is used when the notes are to be even more spread out.

“The Guitar, and how to Study it,” by ARTHUR FROANE, should be read in conjunction with this method. Price 1/- nett; Publishers, BARNES & MULLINS, Bournemouth W.

THE GUITAR has six strings—three gut and three wire-covered silk (generally termed silver). The three gut strings are the highest in pitch, and the three silver are the lowest.

They are tuned in 4ths, with the exception of the interval between the 3rd and 2nd string which is a 3rd.

The strings are named E, A, D, G, B, E. The lowest E is the sixth string; and the high E—the gut—is the first string.

Notes played on the Guitar *sound* an octave lower than they are written. So if the Guitar is tuned by the piano, the actual sound would be :

A simple method of tuning the Guitar is first to tune the lowest string E to the corresponding note on the piano, or by a pitchfork, then place a finger on the 5th fret (\*) which makes the note A. Tune the next string (the 5th) in unison.

The same process is applied to the next two strings—the 5th and 4th. On the 3rd string—G—place a finger on the 4th fret and tune the 2nd string in unison. Upon the second string the original process is repeated, namely, place a finger on the 5th fret and tune the 1st string—E—in unison.

The beginner will now find his Guitar *approximately* in tune. For, as a matter of theory it should be *perfectly* in tune, yet as a matter of fact it is occasionally not so. And the reason is that the strings are not always true, and at other times the fault may be caused by the frets.

Therefore, having got the Guitar approximately in tune by the preceding method, strike the 6th and 1st strings together. They should be two octaves apart. Place a finger on the 2nd fret of the D string (4th) and strike it. It should be a perfect octave from that note to the 1st string or to the 6th string. There are now three strings in tune—the 6th, 4th, and 1st. Place a finger on the 3rd fret of the low E string (6th) and strike the G string (3rd) with it, which should be an octave higher. Lastly, place a finger on the A string (5th) on the 2nd fret and strike the B string (2nd) with it, which should be an octave higher, and the process is complete.

The 6th, 3rd, 2nd and 1st strings struck together make the chord of E minor. By placing fingers on the 2nd frets of the A and D strings, a full chord of E minor is obtained.

There are many ways of tuning the Guitar, which will eventually disclose themselves to the student but these two examples will suffice.

\* The finger of the left hand is not placed *on* the frets named, but always a little below, nearly *between* two frets, but nearer the one named.

On the Open strings.

Ex: 1.

Every time in striking let the first finger cross underneath the thumb. After it has struck the note the 1st finger of the R.H. should hit the top of the ball of the thumb. The 2nd finger should do the same, and the 3rd should hit the middle of the palm. The thumb after striking, single bass notes to rest on the next string. See Plate 5.

Ex: 2.

When two or more notes are played together with thumb and 1st or thumb 1st, 2nd & 3rd, the thumb crosses over the 1st finger above the first joint.

The 12th fret of the Guitar is the octave of each string.

6th string. Play each of these with the R.H. thumb.

Ex 3:

	0	I fret.	II fret.	III fret.	IV	V	VI	VII	VIII	IX	X	XI	XII
	1	2	3	4	1	2	3	4	1	2	3	4	
	XII	XI	X	IX	VIII	VII	VI	V	IV	III	II	I	0
	4	3	2	1	4	3	2	1	4	3	2	1	0

5th string.

0 1 fret. II fret. III IV V VI VII VIII IX X XI XII

XII XI X IX VIII VII VI V IV III II I 0

4th string.

0 1 fret II III IV V VI VII VIII IX X XI XII

XII XI X IX VIII VII VI V IV III II I 0

3rd string. Play each of the notes on 3rd: 2nd: & 1st: strings with 1st: finger of R.H.

0 I II III IV V VI VII VIII IX X XI XII

XII XI X IX VIII VII VI V IV III II I 0

2nd string.

0 I II III IV V VI VII VIII IX X XI XII

XII XI X IX VIII VII VI V IV III II I 0

1st string.

0 I II III IV V VI VII VIII IX X XI XII

XII XI X IX VIII VII VI V IV III II I 0

A knowledge of the finger-board is of course, absolutely necessary. By practising the above, considerable benefit will be derived. It enables the student to place his fingers on any note or chord in any position without hesitation. If the student, when practising the above, will suddenly stop in the middle of a string, and ask himself what note that is, he will soon obtain a complete grasp of the notes on the finger-board.

The following 22 Exs: are written partly for the purpose of giving proper use and flexibility to the R. H. but more especially to show the students the correct way to approach pulling a chord, by playing the notes forming a chord slowly, as an arpeggio, and gradually increasing the speed till the effect of a chord is produced. Not only speed but accent has a great deal to do with this.

In Ex: 5 place thumb, 1st & 2nd fingers on strings before pulling them, do this at the beginning of each bar. When striking with the thumb raise it to the middle joint of 1st finger and let it remain there until next wanted. Let the 1st joints of 1st & 2nd fingers be limp and bent a little inward, not hooked on to the strings with the 1st joint held stiff.

A chord is always played on the Guitar in an Arpeggio manner.

Ex: 5.

In Ex: 6. play the same as the 1st but quicker and smoother. Place ^ . & .. fingers on before pulling on the 1st & 3rd beat.

Ex: 6.

In Ex: 7. place thumb and 2nd fingers only on strings before pulling. Raise the thumb always after striking unless told to the contrary.

Ex: 7.

Ex: 8. same as Ex: 7. only quicker.

Ex: 8.

In Ex: 9. place thumb 1st & 2nd on G. B & E. before pulling them, at the beginning of each bar.

Ex: 9.

Ex: 10.

In Ex: 11. place thumb, 1st & 2nd fingers on strings before pulling them on 1st 2nd 3rd & 4th beats. Play the two small notes quickly and let the accent be on the principal note E.

Ex: 11.

Ex: 12. is practically the same as Ex: 11 as all chords on the Guitar are arpeggio, but it must be remembered that though the accent comes on the top note: the first note G, must be played on the beat.

Ex: 12.

In Ex: 13. place thumb 1st & 2nd fingers on strings before pulling on 1st & 3rd beat, slide the thumb on to the A string after pulling low E string. Raise thumb after pulling G string.

Ex:13. 

Same as above but place the thumb & 2nd: finger only on 1st: & 3rd: beats.

Ex:14. 

In Ex: 15. place thumb, 1st & 2nd fingers on before pulling on 1st 2nd 3rd & 4th beats, slide thumb after pulling low E:

Ex:15. 

Same as above. Make the accent on the low E.

Ex:16. 

Same as above, only make the accent on the top note B. Play this Ex: twice, first: sliding the thumb on to A string, next time raising it.

Ex:17. 

Play exactly in the same way as above, but the low E comes on the beat not before it. Practise it both ways both raising and sliding the thumb.

Ex:18. 

Exercise for pulling chords of 3 notes with thumb, 1st: & 2nd: fingers of R.H. using either open strings or only one finger of L.H. Chords of 3 notes, *on whatever strings*, are played with  $\wedge$  .. fingers of R.H.

Do not raise the fingers from the chords suddenly. If so, a dead sound is the result. Let them remain on the strings for the full value of the notes.

Ex: 26.

Chords of 4 notes with thumb, 1st: 2nd: & 3rd: fingers of R.H. and using 1 or 2 fingers of L.H. and later, employing 3 fingers of L.H.

Ex: 27.

IP. A Barré is made by placing the 1st finger straight across the strings. Not necessarily across *all* the strings.

# Progressive Exercises.

Each bar of the following Exercises (or most of them) is a chord written in single notes, therefore the fingering of each bar can be prepared beforehand.

Ex. A.

Exercise A consists of ten staves of music. The key signature is one sharp (F#) and the time signature is 6/8. Each staff contains a sequence of chords written as single notes. The chords progress through various positions and voicings. Fingering numbers (1, 2, 3, 4) are indicated above the notes to guide the student. Some notes have an accent (^) above them. The exercise concludes with a double bar line.

Ex. B.

Exercise B consists of two staves of music. The key signature is one sharp (F#) and the time signature is 4/4. Each staff contains a sequence of chords written as single notes. Fingering numbers (1, 2, 3, 4) are indicated above the notes. Some notes have an accent (^) above them. The exercise concludes with a double bar line.

Ex. C.

Exercise C is a piece in G major and 4/4 time. It consists of seven staves of music. The right hand part is written in a treble clef and includes various rhythmic values such as quarter notes, eighth notes, and sixteenth notes. It features several fingerings (1, 2, 3) and some slurs. The left hand part is written in a bass clef and provides a simple harmonic accompaniment with chords and single notes.

Ex. D.

Exercise D is a piece in G major and 2/4 time. It consists of three staves of music. The right hand part is written in a treble clef and includes various rhythmic values such as quarter notes, eighth notes, and sixteenth notes. It features several fingerings (1, 2, 3, 4) and some slurs. The left hand part is written in a bass clef and provides a simple harmonic accompaniment with chords and single notes.

Ex. E.

Exercise E is a piece in G major and 6/8 time. It consists of two staves of music. The right hand part is written in a treble clef and includes various rhythmic values such as quarter notes, eighth notes, and sixteenth notes. It features several fingerings (1, 2, 3) and some slurs. The left hand part is written in a bass clef and provides a simple harmonic accompaniment with chords and single notes.

Ex: F.

In reference to fingering of this Ex; see page 13, Scale D.

Ex: G.

Ex: H.

Ex: I.

Musical notation for Exercise I, first system. Treble clef, key signature of two sharps (F# and C#), 6/8 time signature. The melody consists of eighth notes with various fingering numbers (1, 2, 3) above them. There are some rests and slurs.

Ex: J.

Musical notation for Exercise J, second system. Treble clef, key signature of three sharps (F#, C#, G#), 4/4 time signature. The melody consists of eighth notes with various fingering numbers (1, 2, 3, 4). Includes markings for "V Pos.", "VII Barré", and "VIII".

Ex: K.

Musical notation for Exercise K, third system. Treble clef, key signature of three sharps (F#, C#, G#), 6/8 time signature. The melody consists of eighth notes with various fingering numbers (1, 2, 3). Includes markings for "IV Pos.", "Barré", and "Barré".

Ex: L.

Musical notation for Exercise L, fourth system. Treble clef, key signature of two sharps (F# and C#), 12/8 time signature. The melody consists of eighth notes with various fingering numbers (1, 2, 3, 4). Includes markings for "Barré".

Ex: M.

Ex: N.

Ex: O.

Ex. P.

Exercise P consists of 12 measures in 3/4 time, marked with a treble clef and a key signature of one sharp (F#). The notation includes a melodic line with various rhythmic values and fingerings (1-4), and a bass line with chords and single notes. The exercise concludes with a final cadence.

Ex. Q.

Exercise Q consists of 12 measures in 2/4 time, marked with a treble clef and a key signature of two sharps (F# and C#). The notation features a melodic line with many slurs and fingerings, and a bass line with chords. The exercise ends with a final cadence.

Ex. R.

Exercise R consists of 12 measures in 2/4 time, marked with a treble clef and a key signature of one sharp (F#). The notation includes a melodic line with slurs and fingerings, and a bass line with chords. The exercise concludes with a final cadence.

Ex. U.

V Pos. III

Barre.

Ex. V.

Ex. W.

Now turn to Embellishments of the Guitar.(page 35 & 36.)and study Vibrato, Arpeggio,and Quality of tone.

The *bass notes* of scales may be *all* played by the R.H. thumb, but the correct way is thumb and 1st: finger alternately.

Key of C.

Musical notation for the first line of a scale exercise in C major. The notes are C4, D4, E4, F4, G4, A4, B4, C5. Fingerings are indicated above the notes: 3, 2, 3, 2, 1, 3, 1, 3, 1, 3, 2, 3, 2. Accents are placed under the bass notes C4, D4, E4, F4, G4, A4, B4, and C5.

Ex: 28. Musical notation for the second line of the scale exercise. Notes: C4, D4, E4, F4, G4, A4, B4, C5, B4, A4, G4, F4, E4, D4, C4. Fingerings: 3, 1, 2, 1, 2, 4, 1, 1, 3, 1, 2, 1, 3, 1, 2, 3, 2, 3. Accents under bass notes.

Musical notation for the third line of the scale exercise. Notes: C4, D4, E4, F4, G4, A4, B4, C5, B4, A4, G4, F4, E4, D4, C4. Fingerings: 3, 2, 1, 3, 2, 1, 4, 1, 3, 2, 4, 2, 3, 2, 3, 3. Accents under bass notes.

When a scale passage is played slowly the R:thumb may be used for repeated Bass notes, but when it is played quickly, the thumb and 1st: finger alternate. The 1st: & 2nd: are always used alternately in a scale passage on the Gut strings. Raise the R:thumb after striking. Let it cross above 1st finger.

Ex: 29. Musical notation for an arpeggio exercise. Notes: C4, E4, G4, C5, B4, A4, G4, F4, E4, D4, C4. Fingerings: 1, 2, 3, 2, 1, 2, 3, 2, 1, 2, 3, 2, 1, 2, 3, 2, 1. Accents under bass notes.

Ex: 30. Musical notation for a chord exercise. Notes: C4, E4, G4, C5, B4, A4, G4, F4, E4, D4, C4. Fingerings: 1, 2, 3, 2, 1, 2, 3, 2, 1, 2, 3, 2, 1, 2, 3, 2, 1. Accents under bass notes.

In Ex: 31. give the dotted minims their full value. Do not leave the low note before the end of the bar.

Ex: 31. Musical notation for a rhythmic exercise in 3/4 time. Notes: C4, D4, E4, F4, G4, A4, B4, C5. Fingerings: 3, 4, 1, 4, 1, 3, 2, 3, 1, 1, 3, 1, 1, 4, 1. Accents under bass notes.

Musical notation for the second line of the rhythmic exercise. Notes: C4, D4, E4, F4, G4, A4, B4, C5. Fingerings: 3, 2, 3, 1, 1, 4, 2, 4, 2, 4, 3, 4, 1. Accents under bass notes.

Musical notation for the third line of the rhythmic exercise. Notes: C4, D4, E4, F4, G4, A4, B4, C5. Fingerings: 4, 3, 4, 1, 1, 1, 2, 3, 2, 3, 1, 1, 3, 4, 3, 2, 3, 1, 3. Accents under bass notes.

Do not move the fingers from the position when there is the sign  $\frown$  but strike the joined note again.

## On the Barré.

BARRÉ is the term used when one finger of the L.H. usually the first — is placed across the strings in order to play 2 or more notes on the same fret.

For a short BARRÉ the left wrist remains in its ordinary position, but for the great BARRÉ across 5 or 6 strings the thumb of the L.H. is placed behind the neck nearly under the G string. Get the left wrist well out away from the neck and the 1st: finger or whatever finger is making the Barré perfectly straight, and pressed firmly across the strings. It is most necessary to practise the Barré of the 1st: finger, *unceasingly*, and though at first it will make the wrist tired, it must be persevered with. The Barré is in reality, making a nut with the 1st: finger.

Ex: 74.

Example 74 consists of two staves of music. The top staff is in C major, 2/4 time, and features a series of chords and single notes with a first-finger barré across the strings. The bottom staff continues the exercise with similar patterns, including a double bar line and a repeat sign at the end.

In many cases the 1st: finger is making a Barré, while the others are playing different

notes . Though the word Barré is usually written when it is required, yet when it is fingered and notes are seen to be on the same fret it is understood.

Ex: 75.

Example 75 is a single staff of music in C major, 2/4 time. It shows a sequence of notes with a first-finger barré across the strings, with various fingering numbers (1, 2, 3, 4) and accents.

Ex: 75a

Example 75a consists of two staves of music. The top staff is in G major, 6/8 time, and features a sequence of notes with a first-finger barré across the strings. The bottom staff continues the exercise with similar patterns, including a double bar line and a repeat sign at the end.

Example 75b is a single staff of music in G major, 2/4 time. It shows a sequence of notes with a first-finger barré across the strings, with various fingering numbers (1, 2, 3, 4) and accents.

The Barré is often got by the 2nd: & 3rd: fingers, but they are not so often used as that of the 1st: finger.

Ex: 

Example 75c is a single staff of music in G major, 2/4 time. It shows a sequence of notes with a second and third finger barré across the strings, with various fingering numbers (1, 2, 3, 4) and accents.

## On Positions.

The position of a note or chord is determined by the 1st: finger of the L.H. Position is merely another name for Fret. III Pos. is the 3rd fret. VII is 7th fret, and so on. Whatever other notes or other fingers may be employed, the Position is determined by the 1st: finger.

Ex: 76.

The position of one chord is an exact reproduction of another composed of notes the same distance apart.

In many cases a student, especially in reading music, will stumble over a chord that has many flats or sharps in it, but if the following table be studied the difficulties will be greatly lessened.

Take the Tonic Chord of D Major, which is commonly met with If the fingers be moved in their entirety a fret downwards they will make the Tonic Chord of C# If moved a fret higher from D they will produce the Tonic Chord of Eb

A fret higher than that would produce the Tonic Chord of E but as the next open string is E advantage is taken of it and the position of the fingers altered accordingly.

Ex: 77.

The chords in different styles have the same relation to their fingering. If the chord of D is fingered and the fingers moved a fret higher, they produce the chord of Eb. But as there is no open bass note, it is made by the 1st: finger of L.H. which is ready to fall into its position. If the fingers are moved 4 frets higher than the chord of Eb, that is to the V Pos. The chord of G Major is produced and so on.

Ex: 78.

etc.

# EMBELLISHMENTS OF THE GUITAR.

## The Vibrato $\text{w}$ Vib.

Is one of the most charming effects produced on the Guitar, without it, single notes lose half their sweetness and length of tone.

It is achieved by placing a finger of the L. H. on a note and swaying the hand to and fro in the direction of the head and bridge alternately, the finger remaining firmly on the string.

Take away the thumb from the back of the neck, it enables the hand to sway easily. It should be a fairly quick movement, but not a sharp, nervous tremolo.

The Vibrato, added to the proper production of tone, is the secret of Cantabile, or sustaining notes on the Guitar.

Ex: 79.

Musical notation for Example 79, showing a single note with vibrato markings. The notation is in G major (one sharp) and 3/4 time. The note is a half note. Above the note, there are four vibrato markings (wavy lines) with numbers 4, 3, 2, and 1 above them, indicating fingerings. Below the note, there are four vibrato markings (wavy lines) with numbers 1, 2, 1, and 2 below them, indicating fingerings. The note is sustained for the duration of the measure.

The Mark  $\text{w}$  is not always placed over a note or passage, but is left to the judgement of the player.

The Vibrato is also used for chords of 2 or 3 notes in slow passages. It is a little more difficult than in the case of single notes, because the L.H. has not so much freedom.

Ex: 80.

Adagio.

Musical notation for Example 80, showing chords with vibrato markings. The notation is in G major (one sharp) and 3/4 time. The tempo is marked 'Adagio'. The first measure shows a chord of two notes (G and B) with vibrato markings. The second measure shows a chord of three notes (G, B, and D) with vibrato markings. The third measure shows a chord of four notes (G, B, D, and E) with vibrato markings. The fourth measure shows a chord of four notes (G, B, D, and E) with vibrato markings. The fifth measure shows a chord of four notes (G, B, D, and E) with vibrato markings. The sixth measure shows a chord of four notes (G, B, D, and E) with vibrato markings. The seventh measure shows a chord of four notes (G, B, D, and E) with vibrato markings. The eighth measure shows a chord of four notes (G, B, D, and E) with vibrato markings. The ninth measure shows a chord of four notes (G, B, D, and E) with vibrato markings. The tenth measure shows a chord of four notes (G, B, D, and E) with vibrato markings. The eleventh measure shows a chord of four notes (G, B, D, and E) with vibrato markings. The twelfth measure shows a chord of four notes (G, B, D, and E) with vibrato markings. The thirteenth measure shows a chord of four notes (G, B, D, and E) with vibrato markings. The fourteenth measure shows a chord of four notes (G, B, D, and E) with vibrato markings. The fifteenth measure shows a chord of four notes (G, B, D, and E) with vibrato markings. The sixteenth measure shows a chord of four notes (G, B, D, and E) with vibrato markings. The seventeenth measure shows a chord of four notes (G, B, D, and E) with vibrato markings. The eighteenth measure shows a chord of four notes (G, B, D, and E) with vibrato markings. The nineteenth measure shows a chord of four notes (G, B, D, and E) with vibrato markings. The twentieth measure shows a chord of four notes (G, B, D, and E) with vibrato markings. The notation includes fingerings for each note in the chords and vibrato markings (wavy lines) above each chord.

V Pos.

Barre.

## The Arpeggio †.

Has already been explained. This Sign † is used when the notes of a chord are to be more extended or spread out, than ordinarily.

To get the Arpeggio more clearly and sweetly, it is advisable to raise the little finger of the R.H. But not in every case.

## Quality of Tone.

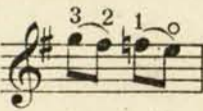

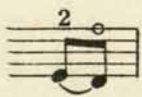

The production of tone is all important. A hard and penetrating tone is effected by striking the strings at the point A. For quick scale passages and for loud full chords it is advisable to play from that point. For a mellow tone, strike across the point B, and for a soft, sweet tone across C. The latter point should be used when the word *dolce* is written. As it is a point nearer the middle of the strings, it gives them a longer vibration and produces a harp-like tone.

Never practise softly. Get as much tone out of the Guitar as is possible without jarring.

## The Slur —

In *ascending* passages the slur is produced by a finger of the L.H. striking with great force the next note above the one pulled by the R.H.  only strike D & A with the R. H. the E & B are produced by the 2nd. finger of the L.H.

In *descending* it is produced by striking the first note with the R.H. and the left finger which is on that note pulled forcibly away which sets in vibration the lower note.  Strike only the G and F. In descending passages the L. finger which is pulled away, should rest on the next open string. For example  the 2nd finger after pulling should be on the G string.

Sor and Giuliani played nearly all scale passages with the slur. Aguado on the contrary played them staccato.

Ex: 81. This instance might be termed a double slur as the second note G is made by pulling away the 2nd finger and the 3rd note A by the same finger descending.—(See next page.)

Play two notes by the L.H. the first note being struck by the R.H.

Ex: 81.

On the descending slur.

Ex: 82.

Ex: 83.

Andante.

Barré.

When a note is pulled by the L.H. on the 1st: string, the finger must fall *below* the fingerboard.

## The Dash

Is used for chords of 3, 4, 5, or 6, notes. When the upward Sign  $\nearrow$  is drawn through the chord it signifies that the thumb should be drawn quickly across the strings. When the opposite sign,  $\nwarrow$  is used the 1st: finger of R. H. is drawn quickly across the string from R. to L.

The 4th: finger of the R. H. is taken up from the sounding board in both cases. Make the accent always on the top note.

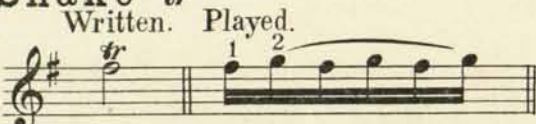

There is an extended use of the Dash played by the 1st: finger and thumb of the R. H.

It is often used in repeated chords and is effected by the 1st: finger of R. H. playing the two or three high notes and the thumb crossing above the 1st: finger after having struck the bass note. Keep the 1st: finger perfectly straight from the middle joint to the finger tip and the thumb raised. The thumb must not rest on the next string. Raise the 4th: finger of R. H. from the sounding-board, partly closing the 4th: 3rd: & 2nd: fingers so that the thumb and 1st are free.

The notes are much clearer and louder played in that manner than if they were fingered  $\wedge$  . . . . .

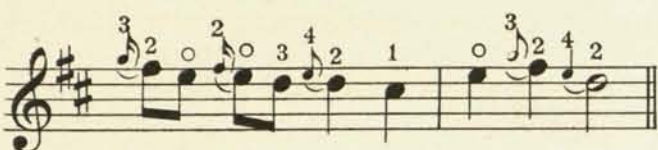

## The Shake *tr*

There are two ways of making the Shake *tr*  The first F# is struck by the 1st: finger of the R. H. and the rest of the notes are made by the L. H. the 2nd: finger of the L. H. striking like a hammer on the G, then pulled away forcibly to sound the F# and the process is repeated. The 1st: finger of the L. H. being, of course, kept down all the time. This manner of making a Shake is in reality the slur ascending and descending. Another method is by playing the two notes on two separate strings—in this instance the B & E.—and using the thumb and 1st: finger of

## Grace Notes.

The *APPOGIATURA* is a single note placed before a large one, of which it usually takes half the value. The bass note is played simultaneously with the small note.

Written.  Played. 

The *ACCIACATURA* and groups of 2 or 3 small notes do not take any of the value of the principal note. They are played lightly and quickly with the accent on the principal note.

In Ex: A. place the fingers on A, G & F# in readiness. After striking the A with the R.H. let the 4th: finger be pulled forcibly away then pull 2nd: away quickly having kept the 1st: finger on the F#.

The R.H. it is shown only strikes *once*.

The *TURN* ∞, 2, is composed of 2, 3 or 4 notes which are sometimes written and at other times the Signs only are used.

## Short Pieces with Grace Notes.

Ex: 84. *Valse.*  *VII Pos Barré.* 

Slide the 3rd finger from E# to F# the other fingers are then in position.

Valse.

Ex: 85.

A musical score for a waltz in 3/4 time, key of D major. It consists of three staves. The first staff contains the melody with various fingerings (1-4) and a 'Barré.' instruction. The second and third staves contain the accompaniment, featuring chords and arpeggiated figures. The piece concludes with a final chord.

### The Glissé.

Is a beautiful effect if not too profusely used. In all Glissé passages strike only the first note; the last note and intermediate ones being made to Vibrate by the finger of the L.H. sliding up and down as the case may be. Place the 4th. finger on the G and slide quickly up to E without stopping .

When this effect is desired the word Glissé is usually written .

A musical staff showing a glissé effect on a single note. The word 'Glissé.' is written above the first note, and 'effect.' is written above a series of notes that rise and then fall, all connected by a slur. This illustrates the sliding motion of the left hand finger.

A musical staff showing a glissé effect on a double note. The word 'Glissé.' is written above the first note, and 'effect.' is written above a series of notes that rise and then fall, all connected by a slur. This illustrates the sliding motion of the left hand finger over a pair of notes.

Double notes can also be executed in the same manner.

In thirds

Example 86: A musical staff in 2/4 time showing a glissé effect on double notes in thirds. The word 'glissé.' is written above the first note. The notes are connected by a slur, and the left hand finger is shown sliding between the two notes.

In sixths

A musical staff showing a glissé effect on double notes in sixths. The word 'glissé.' is written above the first note. The notes are connected by a slur, and the left hand finger is shown sliding between the two notes.

In tenths.

A musical staff showing a glissé effect on double notes in tenths. The word 'glissé.' is written above the first note. The notes are connected by a slur, and the left hand finger is shown sliding between the two notes.

## The Slide

Is altogether different from the Glissé, inasmuch that in the Glissé the first note only is struck, in the slide, *not only is the first note struck but also the one risen or descended to*. I have borrowed this effect from the Violin and Violincello, and in melodic passages it adds a wonderful charm.

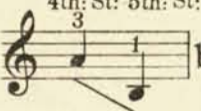

Do not slide up as quickly as in the Glissé, but rather the reverse. For a Slide, the Sign only is used. The Slide is very often effective, when the Glissé would not be so.

In the following Example I should go from one string to another, from the 5th string to the 4th and the fingering also is altered.

In the passage similar to the preceding one, always slide up to the fret below the high note when each principal note is got on two different strings, and retain the finger in position from the low note.

In most cases a complete Chromatic Scale is not made, which is palpably impossible when going from one string to another.

In descending it is the same, If  be fingered 3.1 you will descend to F# on the D string before striking the B. If the 2nd: finger is placed on A, you can descend to F. The fingering is generally determined by the preceding passages. Raise the finger that you have used for the slide before striking the note risen or descended to.

## Etouffe

Is damping the sound. It is produced by striking the strings and suddenly stopping their vibration by placing the R.H. on the strings that have been set in motion. Either use the palm of the R.H. or those fingers that have pulled the chord, suddenly putting them back on the strings as if to repeat the chord; but merely stopping the vibration. It is a pretty effect, peculiar to the Guitar, but should be sparingly employed.

⊕ It is admissible to strike the note risen or descended to in the glissé, but not always advisable.

The word Etouffe is generally written above a passage or bar when it is to be used

Sor never used his R.H. for the Etouffe but produced it by striking the desired chord and then lifting the fingers of the L.H. up but not off the strings. It has the disadvantage of only being applicable to stopped notes, as it is self-evident the open strings would continue to sound unless stopped by the R.H. But as that great master says such effects should seldom be indulged in, and in regard to the beginner never used. When a certain degree of efficiency has been attained, then is the time to practise such effects. Study and amusement can be got without them, at any rate at first, that is why I have not explained all these effects until the end of the first part though most methods have them at the beginning. My impression is that the student should be made acquainted with the manner of producing tone and fingering. There is more pleasure in listening to a little piece played well, than hearing embellishments used badly.

### Harmonic Sounds.

Simple Harmonics are produced by resting the fingers of the L.H. (the 3rd: or 4th: is best) very lightly on a string but not pressing it down; and striking very forcibly with the R.H. near the Bridge.

After striking with the R.H. throw up the finger of the L.H. very quickly.

Harmonics are produced on the 12th: 9th: 7th: 5th: 4th: and a little above and below the 3rd: frets .

The 9th: fret makes the same Harm. sound as the 4th: fret. The clearest Harmonics are those on the 12th: 7th: 5th: & 4th: frets of the covered strings and the 12th: 7th: & 5th: frets on the gut strings .

The following is a table of Harmonic Sounds.

<p>6th: string. XII fret. VII V IV A little below. III</p> <p>The small notes are the actual sounds produced.</p>	<p>5th: string. XII VII V IV III A little below.</p>
<p>4th: string. XII VII V IV III</p>	<p>3rd: string. XII VII V IV III</p>
<p>2nd: string. XII VII V IV III</p>	<p>1st: string. XII VII V IV</p>

Other Harmonics can be got below the III fret and above and below the II fret but they are nearly inarticulate and therefore have refrained from giving them.

Another method, called *double doigter*, of producing Harm. sounds is by stopping the desired note and placing the tips of the R.H. thumb 12 frets higher and striking forcibly with the 1st: finger of the R. H. behind the thumb, the thumb being raised after striking precisely the same as the finger of the L.H. in simple

Harmonics. Any note can be made Harmonic in this manner. For Ex  place the 1st: finger of the L.H. on the 1st: fret lay the thumb of R.H. *very lightly* on the F an *Octave higher*, and strike with 1st: finger as explained.

Result. Ex: 87. Written.

Result. Ex: 88. Written.

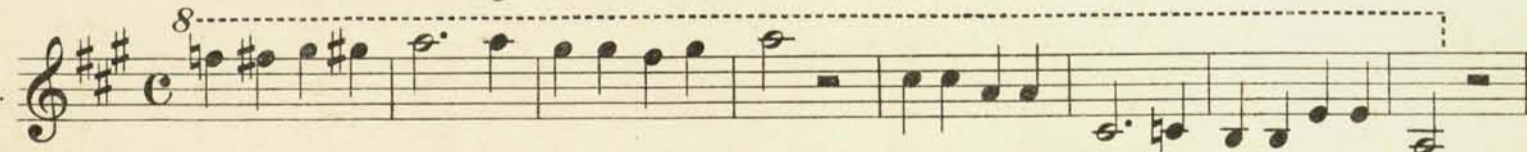

Result. Ex: 89. Written.

Exercise in double doigter Harm:

Ex: 90.

The old masters adapted several other modes of writing Harmonics, but the above is the simplest and easiest to read and was invented by Sor. When a single note only is desired to be made Harm, it is written an octave lower than it sounds and the words Harm. gva written above.

# Scales for Daily Practise.

VIII Pos. C Major. 3rd: 2nd: 1st: 2nd: 3rd: *Loco.*

XI F# Major. 1st: 2nd: X. 3rd: 4th:

X F Major. 2nd: 1st: 2nd: 3rd:

Detailed description: This page contains eight musical scales for daily practice, each in a different major key. The scales are: C Major (VIII Pos.), G Major (VIII Pos.), D Major (VII), A Major (IX), E Major (IX), B Major (VII), F# Major (XI), and F Major (X). Each scale is presented in two lines: an ascending line and a descending line. The ascending lines include various fingering patterns (1-2-3, 1-2-3-4, 1-2-3-4-5) and are often marked with '1st', '2nd', or '3rd' positions. The descending lines include similar fingering patterns and are often marked with '3rd', '2nd', or '1st' positions. Some scales include a 'Loco.' marking, indicating a specific playing technique. The scales are written in treble clef with their respective key signatures (no sharps or flats for C, one sharp for G, two sharps for D, three sharps for A, four sharps for E, five sharps for B, and one flat for F).

2nd: 1st: 2nd:

A musical staff in treble clef with a key signature of two sharps (F# and C#). The melody consists of quarter and eighth notes. Fingerings are indicated by numbers 1-4. There are slurs over groups of notes. The staff ends with a repeat sign.

F# Minor or Gb. 1st: 2nd: 3rd:

A musical staff in treble clef with a key signature of two sharps (F# and C#). The melody consists of quarter and eighth notes. Fingerings are indicated by numbers 1-4. There are slurs over groups of notes. The staff ends with a repeat sign.

1st: 2nd: 3rd: 4th: Loco.

A musical staff in treble clef with a key signature of two sharps (F# and C#). The melody consists of quarter and eighth notes. Fingerings are indicated by numbers 1-4. There are slurs over groups of notes. The staff ends with a repeat sign.

C# Minor or Db. 2nd: 1st: 2nd:

A musical staff in treble clef with a key signature of three sharps (F#, C#, and G#). The melody consists of quarter and eighth notes. Fingerings are indicated by numbers 1-4. There are slurs over groups of notes. The staff ends with a repeat sign.

2nd: 1st: 2nd:

A musical staff in treble clef with a key signature of three sharps (F#, C#, and G#). The melody consists of quarter and eighth notes. Fingerings are indicated by numbers 1-4. There are slurs over groups of notes. The staff ends with a repeat sign.

G# Minor or Ab. 1st: 2nd:

A musical staff in treble clef with a key signature of three sharps (F#, C#, and G#). The melody consists of quarter and eighth notes. Fingerings are indicated by numbers 1-4. There are slurs over groups of notes. The staff ends with a repeat sign.

2nd: 1st: 2nd:

A musical staff in treble clef with a key signature of three sharps (F#, C#, and G#). The melody consists of quarter and eighth notes. Fingerings are indicated by numbers 1-4. There are slurs over groups of notes. The staff ends with a repeat sign.

D# or Eb Minor. 1st: 2nd: 3rd:

A musical staff in treble clef with a key signature of four sharps (F#, C#, G#, and D#). The melody consists of quarter and eighth notes. Fingerings are indicated by numbers 1-4. There are slurs over groups of notes. The staff ends with a repeat sign.

2nd: 3rd:

A musical staff in treble clef with a key signature of four sharps (F#, C#, G#, and D#). The melody consists of quarter and eighth notes. Fingerings are indicated by numbers 1-4. There are slurs over groups of notes. The staff ends with a repeat sign.

D Minor.

First system of musical notation for D Minor. It features a treble clef, a key signature of two flats (Bb and Eb), and a 2/4 time signature. The melody consists of eighth and sixteenth notes with various fingerings (1, 2, 3, 4) and articulation marks (accents and slurs). A '2nd:' fingering is indicated above the final measure.

Second system of musical notation for D Minor. It continues the melody from the first system. It includes '2nd:', '1st:', and '2nd:' fingering markings. A 'Loco.' marking is placed above the final measure.

G Minor.

First system of musical notation for G Minor. It features a treble clef, a key signature of three flats (Fb, Cb, Gb), and a 2/4 time signature. The melody includes fingerings (1, 2, 3, 4) and articulation marks. '2nd:', '1st:', and '2nd:' fingering markings are present above the notes.

Second system of musical notation for G Minor. It continues the melody with fingerings and articulation marks.

C Minor.

First system of musical notation for C Minor. It features a treble clef, a key signature of three flats (Fb, Cb, Gb), and a 2/4 time signature. The melody includes fingerings and articulation marks. A '2nd:' fingering is indicated above the final measure.

Second system of musical notation for C Minor. It continues the melody with fingerings and articulation marks. '2nd:' and '3rd:' fingering markings are present above the notes.

F Minor.

First system of musical notation for F Minor. It features a treble clef, a key signature of four flats (Bbb, Fb, Cb, Gb), and a 2/4 time signature. The melody includes fingerings and articulation marks. '2nd:', '1st:', and '2nd:' fingering markings are present above the notes. A '3rd:' and 'Loco.' marking are also present.

Second system of musical notation for F Minor. It continues the melody with fingerings and articulation marks. '2nd:', '1st:', and '2nd:' fingering markings are present above the notes. '3rd:' markings are also present.

Bb Minor.

First system of musical notation for Bb Minor. It features a treble clef, a key signature of four flats (Bbb, Fb, Cb, Gb), and a 2/4 time signature. The melody includes fingerings and articulation marks. '2nd:', '1st:', and '2nd:' fingering markings are present above the notes. A '3rd:' marking is also present.

Second system of musical notation for Bb Minor. It continues the melody with fingerings and articulation marks. '2nd:', '1st:', and '2nd:' fingering markings are present above the notes. A 'Loco.' marking is also present.

# Scales in Thirds.

Thirds and Sixths are always played with the thumb and 1st. finger except when there is a bass note in [addition.

**C Major.**

Thumb & 1st. used throughout.

**G Major.**

**D Major.**

**A Major.**

**E Major.**

Ex: 99

*dolce.*

Musical notation for Example 99, first system. Treble clef, key signature of one sharp (F#), common time signature. The tempo is Andante and the mood is dolce. The melody is slow and features half notes and quarter notes.

Musical notation for Example 99, second system. Continuation of the slow melody.

Musical notation for Example 99, third system. Continuation of the slow melody, ending with a double bar line.

Vivace.

Ex: 100

Musical notation for Example 100, first system. Treble clef, key signature of two sharps (F#, C#), 2/4 time signature. The tempo is Vivace. The melody is fast and features many eighth and sixteenth notes.

Musical notation for Example 100, second system. Continuation of the fast-paced melody, ending with a double bar line.

Five staves of musical notation in G major (one sharp). Each staff contains a sequence of eighth-note chords, specifically tenths, moving in a stepwise fashion across the staves. The notation includes various fingering numbers (1-4) and articulation marks (accents) above the notes.

Exercises in Tenths.

Ex: 101.   
Two staves of musical notation in C major. The first staff is in treble clef with a common time signature (C). The second staff is in bass clef. Both staves contain eighth-note chords, primarily tenths, with various fingering numbers and articulation marks.

Ex: 102.   
Three staves of musical notation in D major (two sharps) and 2/4 time. The first staff is in treble clef and begins with a piano (p) dynamic marking. The second and third staves are also in treble clef. The notation features eighth-note chords, including tenths, with various fingering numbers and articulation marks.

Ex:103.

Musical notation for Exercise 103, consisting of four staves. The key signature is three sharps (F#, C#, G#) and the time signature is 3/4. The notation includes various rhythmic patterns, slurs, and fingerings (1-4).

Ex:104.

Musical notation for Exercise 104, consisting of two staves. The key signature is one flat (Bb) and the time signature is common time (C). The notation includes various rhythmic patterns, slurs, and fingerings (1-4).

Ex:105.

Musical notation for Exercise 105, consisting of three staves. The key signature is three sharps (F#, C#, G#) and the time signature is common time (C). The notation includes various rhythmic patterns, slurs, and fingerings (1-4).

# Study.

Allegro.

From Op: 19.

The musical score consists of ten staves of music. The first staff begins with a treble clef, a common time signature, and a forte dynamic marking. The key signature has one sharp (F#). The music is characterized by rapid sixteenth-note passages and complex chordal textures. Fingerings are indicated by numbers 1-4 above or below notes. A 'Barrè.' instruction appears above a measure in the fifth staff. A 'gliss.' instruction with a number '4' is placed above a measure in the third staff. The sixth staff includes a diagram of a guitar fretboard showing the 4th string, 7th position, and 4th fret, with notes G4, A4, B4, and C5. The seventh staff contains a diagram of a guitar fretboard showing the 4th string, 3rd position, and 4th fret, with notes E4, F4, G4, and A4. The eighth staff features a diagram of a guitar fretboard showing the 4th string, 7th position, and 4th fret, with notes G4, A4, B4, and C5. The ninth staff includes a diagram of a guitar fretboard showing the 4th string, 7th position, and 4th fret, with notes G4, A4, B4, and C5. The tenth staff concludes with a 'Har:' instruction above a measure.

# Study for the R. H.

Con moto.

From Op. 41.

This musical score is for a right-hand study in G major, 2/4 time, marked 'Con moto'. It consists of ten staves of music. The first staff begins with a treble clef, a key signature of one sharp (F#), and a 2/4 time signature. The music is written in a single melodic line with various fingering numbers (1-4) and accents. The second staff continues the piece. The third staff includes the instruction 'Barrè.' above the staff. The fourth staff contains the Roman numeral 'VIII' above the staff. The fifth staff continues the melodic line. The sixth staff continues the piece. The seventh staff includes the instruction 'Barrè.' above the staff. The eighth staff continues the piece. The ninth staff includes the instruction 'Barrè.' above the staff. The tenth staff concludes the piece with a double bar line. The paper shows signs of age, including some staining and wear at the bottom edge.

# Study on repeated notes.

From Op: 43.

Allegro.  
VI Pos.

Barré.

The musical score consists of ten staves of music. The first staff is in treble clef, 2/4 time, with a key signature of one flat (B-flat). It features a sequence of chords and melodic lines with fingerings (1, 2, 3) and a 'Barré.' instruction. The second staff is in treble clef, 4/4 time, with a key signature of one flat, marked 'cres.' and 'f'. The third staff is in treble clef, 4/4 time, with a key signature of one flat, marked 'XII Barré. 2nd: or 3rd: fingers.' The fourth staff is in treble clef, 4/4 time, with a key signature of one flat, marked 'Barré.'. The fifth staff is in treble clef, 4/4 time, with a key signature of one flat, marked 'rit.' and 'a tempo'. The sixth staff is in treble clef, 4/4 time, with a key signature of one flat, marked 'Barré.'. The seventh and eighth staves are in treble clef, 4/4 time, with a key signature of one flat, featuring repeated notes and slurs. The ninth staff is in treble clef, 4/4 time, with a key signature of one flat, marked 'dim e rall.'. The tenth staff is in treble clef, 4/4 time, with a key signature of one flat, featuring repeated notes and slurs.

# Study.

From Op. 2.

Allegro.

The musical score is written for guitar and consists of eight systems of two staves each (treble and bass clef). The key signature is one sharp (F#) and the time signature is 3/4. The piece is marked "Allegro" and begins with a forte (*f*) dynamic. The notation includes various guitar-specific techniques and fingering instructions:

- System 1:** Treble staff starts with a forte *f* dynamic and a 4-fingered scale. Bass staff has a whole note chord. Markings include "V Pos. 2" and "3 1".
- System 2:** Treble staff continues the scale with "Barré." marking. Bass staff has a whole note chord. Markings include "V Pos. 2", "3 3", and "1 3 1".
- System 3:** Treble staff has a "Barré." marking. Bass staff has a whole note chord. Markings include "4 3 1", "2 1", and "4 3 1".
- System 4:** Treble staff continues the scale. Bass staff has a whole note chord. Markings include "3 1 4 3 1".
- System 5:** Treble staff continues the scale. Bass staff has a whole note chord. Markings include "4 3 1".
- System 6:** Treble staff continues the scale. Bass staff has a whole note chord. Markings include "4 3 1".
- System 7:** Treble staff continues the scale. Bass staff has a whole note chord. Markings include "4 3 1".
- System 8:** Treble staff continues the scale. Bass staff has a whole note chord. Markings include "1 3 4 2 4", "rit.", "4 3", and "Barré.".
